Taking Action

Raise Awareness

Educate

Set up a small government

Organizations

The Pacific Institute

The Pacific Institute is a leader in producing research and informational resources about water conservation. They provide frequent reports on water conservation issues not only in India, but around the world including sustainability, water conflicts, and water use for agriculture and energy.

<https://pacinst.org/>

World Water Council

The World Water Council is an international organization that promotes political awareness and action on water conservation issues. Right now, that organization is planning its 7th World Water Forum in South Korea, which brings together participants from the international water community to exchange ideas and develop partnerships.
